Professional Profile

Systems Engineering student with hands-on experience developing software applications and AI-powered systems. Experienced with Python, REST APIs, RAG, LLMs, and vector databases, as well as modular architectures, information retrieval, testing, and debugging.

Particularly interested in software development, Generative AI, automation, and integrating AI capabilities into real-world applications.

Work Experience

October 2025 - February 2026 | Chatbot Developer Intern | Enhance UPV

Valencia, España

- Independently developed and delivered a functional software application during more than 250 hours of internship work.
- Designed a modular and scalable architecture using structured JSON-based configurations.
- Integrated Python services, REST APIs, Milvus vector storage, and RAG pipelines for information retrieval and processing.
- Performed testing, debugging, issue resolution, and iterative improvements throughout the development lifecycle to deliver a functional solution based on user requirements.

March 2024 - September 2024 | Expeditor | Cactus Club Cafe

Vancouver, Canada

- Coordinated workflow between multiple teams in a fast-paced environment.
- Assumed leadership responsibilities during supervisor absences.

Education

Universitat Politècnica de València — Bachelor's Degree in Systems Engineering and Management for Innovation Challenges

Mar 2024 – **Expected Graduation:** 2028 | Valencia, España

Langara College — Computer Science

Jan 2024 – Aug 2024 | Vancouver, Canada

Technical Skills

Languages & Technologies: JavaScript (Intermediate), Python (Intermediate), SQL, HTML, CSS

Software Engineering: REST APIs, Object-Oriented Programming (OOP), Data Structures, JSON, Testing, Debugging

Artificial Intelligence & Data: RAG, LLMs, Prompt Engineering, Data Analysis, Multivariate Analysis

Tools: Git, GitHub, Visual Studio Code, RStudio, Milvus, Gradio

Languages

Spanish (Native) · English (Fluent)
